## Modifications Crane & offshore equipment

### UPGRADE YOUR OFFSHORE EQUIPMENT TO THE LATEST STANDARDS

Crane and offshore equipment modifications are often required to service larger vessels, increase productivity or lifting capacity, change of operations or complying with latest legislation and regulations.

A modification can also be made for ergonomic reasons. Ergonomics is the equipment and tools designed for workers to increase productivity and efficiency while reducing discomfort and fatigue. Implementing a new design or ergonomic solution will not only provide employees more comfort, but will also make the workplace safer and reduce costs.

Modifying existing equipment can be quicker and is often a more economical alternative than purchasing new cranes.

*ANY EQUIPMENT, ANY BRAND*

## WHY A MODIFICATION?

Your equipment currently in place may have been purchased many years ago. Although still functioning to your satisfaction, a modification might be needed or being considered for many reasons, like:

- Change in legislation,
- Additional safety regulations or improving safety,
- Ergonomic reasons,
- Increase in productivity or lifting capacity,
- Change in operations,
- Saving on capital expenditure while benefitting from new technologies,
- Reduction of maintenance costs,
- Increasing reliability,
- End-of-life technology (software).

## A SELECTION OF EQUIPMENT FOR MODIFICATION

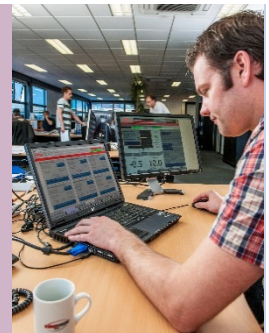

- Operator cabins,
- Ergonomic operator chairs,
- Controls,
- Air conditioning.

## WHY SELECT KENZFIGEE?

- OEM supplier of KenzFigeer crane and offshore equipment,
- Experience with other crane types and brands,
- Knowledge of legislation & safety regulations,
- Large vendor network.

*When needed, our dedicated team of skilled engineers can provide service support on location, also during remote access.*

*Our highly trained professionals are available to carry out planned maintenance or emergency repairs, with expert back-up from our headoffice.*

## INTERESTED?

Do you consider a modification, you can call the professionals of KenzFigeer for an inspection or evaluation of your equipment to determine if the selected modification is the best option.
