## **SERVICE ENGINEER – ELECTRICAL/PLC**

For our branch office **KenzFigee UK in Aberdeen** we are looking for an experienced Electrical/PLC service engineer. Applicants must stay approximately 1 hour commute to Aberdeen.

### **Purpose of the function**

The duty of the Service Engineer will be to work offsite, onshore or offshore to carry out maintenance schedules and repairs to offshore cranes or similar offshore equipment. There may be short terms of work at the onshore service base. The Service Engineer supports the clients requirements as directed by the operations and engineering department. You will have excellent experience of LV and HV systems and be familiar with PLC's.

### **Summary**

- Carry out maintenance work as per the schedules for the equipment;
- Carry out repairs and modifications as dictated by the engineering department;
- Be competent at understanding and following schematic diagrams;
- Be able to compile daily reports and technical assessments of the equipment as required;
- Be able to fault find problems and liaise with onshore engineering assistance as required;
- Be willing to train and develop following the competency graded scheme.

We are looking for a proactive enthusiastic engineer who will be competent and professional. A competitive package will be provided.

### **Interested?**
